just added the urls to download  ActuallyNull committed 1 minute ago	dd826a0		
implemented a website_to_pdf script to automate the proof retrieval process from github  ActuallyNull committed 1 hour ago	408635a		

Commits on Aug 15, 2025

quick commit since im leaving town for a bit, added some more class weight for other arrhythmia, and extra augmentation for other arrhythmia class since thats the biggest problem so far  ActuallyNull committed last month	0269252		
model 2.1, added ensemble models  ActuallyNull committed last month	3cecf59		

Commits on Aug 14, 2025

Model 2.0, Spreadsheet updated: improved ecg data augmentation, implemented ecg data generator for on the fly data augmentation, improved data normalisation, adjusted parameters in data augmentatio... ...  ActuallyNull committed last month	3cad777		
---	---------	---	---

Commits on Aug 13, 2025

frfr reverted everything now  ActuallyNull committed last month	f3a27a3		
ACTUALLY reverted everything to v1.6 since new data processing algo messed everything up  ActuallyNull committed last month	8b404bd		
Revert "model v1.6, note: forgot to commit v1.5; (v1.5, modularised v1.4 architecture, implemented validation sets to model.fit) v1.6: implemented resnet arch, implemented sparse categorical focal  ActuallyNull committed last month	b7584d1		
tried to refactor the data processing algorithm??? im just committing so i can revert back to model 1.6 cause this version sucks  ActuallyNull committed last month	5e59d9e		
model v1.6, note: forgot to commit v1.5; (v1.5, modularised v1.4 architecture, implemented validation sets to model.fit) v1.6: implemented resnet arch, implemented sparse categorical focal loss; so... ...  ActuallyNull committed last month	1b17f14		
model v1.4, data_preperation now obsolete, all included in data_processing.py; improved data processing algorithm (all in one -> batch processing), added more regularisation to the model (added mor... ...  ActuallyNull committed last month	7a0765b		

Commits on Aug 12, 2025

Model v1.3, spreadsheet updated, modified model architecture,decreased batch_size, improved data_processing and preperation algorithms  ActuallyNull committed last month	849e037		
Model V1.2, Spreadsheet updated, changed model architecture, added roc/auc curves, batch_size 64->100  ActuallyNull committed on Aug 11	ac35ccb		

Commits on Aug 11, 2025

model v1.1; added earlystopping and reducelronplateaucallback  ActuallyNull committed on Aug 11	0d30bde		
made a VERY loose model architecture i saw from a research paper and just thought i should document it  ActuallyNull committed on Aug 10	6e25aff		
added script for data preparation to be fed into dcnn, reshaping X dataset and encoding y labels + making 70/15/15 train val test splits  ActuallyNull committed on Aug 10	c9b2738		

Commits on Aug 10, 2025

made an ecg_augmentor class for data augmentation and implemented it into the data processing pipeline  ActuallyNull committed on Aug 10	1b602dd		
added a bandpass filter, smote and signal resampling, and improved preprocess group function  ActuallyNull committed on Aug 10	32ee47e		
added standardisation and normalisation for features in samples dataset  ActuallyNull committed on Aug 10	e0c92f0		
decided im not gonna do mitbih data processing since theres no reference csv, much too complicated for any real benifit, start working on preprocessing tomorrow  ActuallyNull committed on Aug 9	e4f48d4		
finished physionet X, y dataset loader, still need mit-bih loader  ActuallyNull committed on Aug 9	e8f8d3d		
started a data_processing algorithm, X dataset is done, still need to include the y labels  ActuallyNull committed on Aug 9	0f43883		
init project  ActuallyNull committed on Aug 9	ccbb856
